- 1) ~~a) stress testing~~  
a) Load testing  
b) Stress testing
- 2) Usability testing

3) Smoke testing

4) There may be some number of developers for BUs. When they integrate their work/code ~~part~~ into the main code base, they need to retest it to check whether it all works correctly together.

Some developer may work for registration, some may work for grade. We need to test whether it works correctly in case of course prerequisites or ~~or~~ in case of showing available courses. Or, it should be tested whether grading page shows all registered courses.
