## Submission Guideline

- Each project group will submit a short video (**max 8 minutes**) on the final project.
- The submission deadline is **12th December (Saturday) 10:00 AM** for all sessional groups (A1, A2, B1, B2).
- Only **one of the group members** should upload the video on youtube or google drive and submit the link in Moodle within the deadline.

## Evaluation

- There will be a final viva on the project. Each group will play their pre-recorded video and then there will be a 3 minutes long **Q/A session**.
  - There won't be any quiz for CSE 216 sessional. This is the final evaluation.
- Each group member must present a portion of the project (what he/she has done) in the pre-recorded video and **must be present during the Q/A session**.

## Video Content

- In 6 minutes, demonstrate the functionality of the project briefly. Try multiple times until the presentation is really good. If this is a group project, try to record the video individually (each member presenting the portion he/she has done), and later merge two recordings. It is recommended that each group member shares a similar amount of screen-time.

- The last 2 minutes should focus on technical aspects (frameworks, ERD/Database schema, PL/SQL). Clearly mention the use cases where you applied trigger(s), function(s), and procedure(s). You don't need to show the codes of trigger/function/procedure.

- The 6 minutes and 2 minutes breakdown above can be considered as recommended but not strict. However, the total length of the video **must not exceed 8 minutes**.

- It is strongly encouraged to demonstrate the project using meaningful data.
